DATA SYNCHRONIZATION

DEVICE MANAGEMENT

## DATA SYNCHRONIZATION

- DATABASES
- FILES

### Optimize data synchronization

MediaContact® offers data synchronization services for decentralized applications and systems. It integrates with business applications to automate, track and secure all types of different data exchanges. Synchronization is carried out by processes that do not require any programming.

- Automate data exchanges
- Track flows
- Optimize communications

#### For a variety of applications:

- Service call management
- Data collection
- Transmission of sales information
- Transmission of reports
- Quality control, technical inspection
- Inventory management
- Synchronization of sales books, reports
- ...

## SOFTWARE

- ADMINISTRATION
- SYNCHRONIZATION

MediaContact® is designed for sales representatives, technicians, examiners, carriers, pharmaceutical sales representatives, etc.

## DEVICE MANAGEMENT

- LAPTOP
- PDA'S
- TABLET PC'S

### Maintain and secure mobile device

MediaContact® offers Mobile Device Management. It makes it possible to control, manage and secure mobile terminals remotely. Administration tasks are carried out by processes that do not require any programming.

- Keep configurations up-to-date
- Anticipate and resolve malfunctions
- Decrease the workload for your helpdesk

#### For a variety of uses:

- Provisioning, roll-out
- Remote distribution of software, patches, updates, etc.
- Hardware and software inventory
- Monitoring of the network, battery, memory, CPU, etc.
- Data backup and restoration
- Verification of proper functioning
- ...

Database synchronization	File synchronization
<ul style="list-style-type: none"> <li>Import and export data in CSV format</li> <li>Import and export SQL data</li> <li>Process local or remote files</li> <li>...</li> </ul>	<ul style="list-style-type: none"> <li>Differential synchronization of all file types and tree structures</li> <li>Push and pull mode</li> <li>Synchronization of all file sizes</li> <li>Real-time synchronization</li> <li>...</li> </ul>

## STRONG POINTS

**MEDIA CONTACT**

Device Management - Data Synchronization

- ➔ **Compatible with a variety of mobile devices** (PDAs, laptops, tablet PCs, etc.) and **networks** (LTE, 3G, xDSL, LAN, etc.)
- ➔ **User-friendly**, configurable interface
- ➔ **Solution designed** for helpdesks
- ➔ **Optimization and synchronization** of all data types
- ➔ **Suitable for configurations** ranging from a few terminals to several thousand remote terminals

## BENEFITS

[www.telelogos.com](http://www.telelogos.com)

Company	Administrator	User
<ul style="list-style-type: none"><li>■ Makes it easy to give users mobility</li><li>■ Offers a long-term, scalable solution</li><li>■ Reduces administrative and operating costs</li></ul>	<ul style="list-style-type: none"><li>■ Manages data flows</li><li>■ Supervizes and maintains control over remote terminals</li><li>■ Makes it possible to anticipate and resolve malfunctions</li></ul>	<ul style="list-style-type: none"><li>■ Ensures reliable, secure, up-to-date data</li><li>■ Eliminates technical constraints</li><li>■ Allows users to fully dedicate themselves to their job</li></ul>

- **More than 250,000 licenses** are being used worldwide
- Trusted by **2000 customers**

  
**TELELOGOS**  
30 YEARS OF EXPERIENCE

« Our daily challenge is to optimize, simplify and secure all types of exchanges and to provide our clients with highly effective services to synchronize and manage fixed, remote and mobile devices. »

Yves Clisson, President of TELELOGOS
